EXPERIENCE SUMMARY:

Systems Engineer with sixteen years of experience in designing, implementing and administering Token Ring and Ethernet topology, performing server installations, repairs, maintenance, and providing technical support.
 Experienced network engineer with design, configuration, deployment and troubleshoot of level 2 switching networks.
 Extensive Active Directory experience with establishing Active Directory Domain, creating and configuring Active Directory Objects and Trusts, creating and configuring Group Policy, established AD sites and configured efficient replication and diagnosed domain level problems.
 Setup local file and print servers with R2 replication to the data center.
 Built and configured Windows 2003 servers locally and remotely, applied patches and security.
 Planned and configured performance monitoring, troubleshoot issues and recovered servers.
 Built, configured, deployed and managed storage. Configured audit policy.
 Built Windows 2003 and 2008 file shares clusters.
 Managed cluster performance, tested periodic fail over and troubleshoot cluster issues.

An individual who thrives on challenge and personal involvement.
 Possesses outstanding computer knowledge, network experience and is focused on maximum business investment return.
 Exceptional commitment to end-user services, particularly productivity, information quality, customer responsiveness and cost control while minimizing end user down time.
 An analytical problem solver capable of quickly learning and adapting to new technologies while remaining committed to quality.

EDUCATION:

DeVry Institute of Technology, Addison, Illinois
 Bachelor of Science in Electronic Engineering and Technology

CERTIFICATIONS:

Novell Advanced Network Administration, PPI Course 525
 A+ Certification, Drake College
 Dell Certification, Dell Education

TECHNICAL SKILLS:

Coordinated and migrated users and their machines to Active Directory.
 Strong problem solving skills; ability to assess a problem and determine a course of action.
 Ability to work effectively and add value as a global team member and support customers.
 Knowledge in Intel or AMD server hardware support, management, and troubleshooting.
 Experience with P2V migration and VMware virtualization.
 Experienced with VDI technologies; such as Citrix or VMware View.
 Managed projects to setup Windows 2003 servers, and migrated security, data and network applications from Novell Netware 4.2 and 6.0 servers for over 20 offices nationwide, ranging from 60 to 500 users.

Managed projects to migrate the data from TACIT network devices to Windows 2003 R2 servers.
 Designed, implemented and maintained infrastructure Enterasys Switch replacement program with centralized monitoring system.
 Worked and with various backup software, such as ArcServe, Backup Exec and Comm. Vault to efficiently backup and retrieve crucial business data.
 Diagnosed and repaired various networking equipment, server DFS links, and replication, security and connectivity issues to allow for business continuity.
 Administered Microsoft Exchange and maintained MS Mail, local and remote.
 Excellent working knowledge of computers and operating systems including MS DOS, Windows 3.1, 3.11, 95, 98, NT, ME, 2000, XP, Vista, Windows 7, Novell Netware 4.11, 6.0 and Windows 2003 Server.
 Utilized software: MS Office, AmiPro, Word Perfect, Lotus Suite, MS Access, MS Mail Local and Remote, ProComm Plus, PC Tango, Backup Exec, Xtalk, R2host, PcAnywhere, MRI, Argus, DynaLease, ACT and other diagnostic and development software.
 Thorough and organized in coordinating project deadlines and information.
