PROFESSIONAL EXPERIENCE:

Sr. Microsoft Exchange and Systems Engineer
USDA
Springfield, IL (2008-2010)

Design, Implement, Maintain IT infrastructures for Exchange platform and new infrastructure releases.
Typical IT infrastructures include Active Directory, File, Email, Database, Application and Backup.
Most physical and virtual servers are built on HP Proliant servers using local or external storages.
Design and build DR sites for most clients. Utilized AD, DFS-R, DoubleTake, Exchange Built-in replication to replicate data from Production servers to DR servers.
Perform DR failover tests once or twice a year for all clients.
Upgrade existing clients' IT infrastructure with the latest technologies including Server 2008 R2, VMWare ESX4.0/ESXi, MS Exchange 2007 (SCR/CCR), Citrix XenApp Server 5.0, NetApp SAN
Actively worked with market vendors for installations, configurations, or migrations for: Bloomberg, Reuters, Advent products (Partner, Geneva, Axs), Protrak, Pertrak, and many other 3rd party apps
Coordinated with telco providers for new circuit implementations, provisioning, and active turn-up
Extensively engaged with hosted providers for implementing hosted messaging, backup, archiving, or virtualized storage solutions for client requirements
Designed, planned, and implemented Exchange 2010 environments for multiple customers
Designed, planned, and executed Exchange 2007 migrations for multiple customers from Exchange 2003, Mirapoint, SendMail, and Domino
Designed and implemented a custom self-service migration tool for users to migrate from Domino and SendMail to Microsoft Exchange
Designed and implemented multiple Active Directory implementations for over 300,000 users
Designed and led the implementation of ILM2007 for multiple customers totaling 150,000 user objects
Acted as a sales engineer in support of presales activities with existing and potential customers
Oversaw technical subcontractors and employees across multiple projects

Systems Analyst
Microsoft Inc.
Redmond, WA 2004 - 2008

Performed several design, planning and implementing small/medium IT infrastructures.
Led support efforts for small businesses (10-100 computers) companies IT structures.
Led support efforts AD DS and Exchange user migrations.
Microsoft virtualization (Virtual PC and Hyper-v)
Microsoft cluster service (MSCS)
Network vulnerability assessment and penetration testing
Troubleshoot and repaired various problems with Microsoft Exchange Server
Configured Microsoft Systems Center Operations Manager
Built several test environments for Exchange 2003 and 2007 implementation
Archived mail using Exchange native archiving tools
Reorganized AD structure and created group policies
Developed migration and testing plans for the migration to Active Directory to 2003.
Created and applied Group Policy Objects,
Created and administered Organizational Units, service accounts as well as day-to-day administrative tasks.
Researched and documented secure solutions for enabling cross-forest trusts and other Single Sign On solutions
Designed and implemented test beds for Pilot testing
Designed and implemented DHCP, WINS, DNS infrastructures on Windows NT, and Windows 2000
Designed and implemented Windows NT / Windows 2000 infrastructure
Designed and implemented Microsoft Exchange mail solution on Windows NT and Windows 2000
Designed and implemented group policy solutions for Windows 2000
Designed and implemented Disaster Recover solutions for Enterprise networks
Designed and implemented test beds for Pilot testing
Designed and implemented DHCP, WINS, DNS infrastructures on Windows NT, and Windows 2000

Lead Systems Engineer
PortCullis TrustNet (Singapore) Pte Ltd 2003 - 2004

Installed and configured Exchange Server 2003 FE & BE
Transitioned from Exchange Server 2003 to Exchange Server 2007
Installed and Configure Edge Transport Server 2007
Implemented Security by configuring Anti-Spam Agents in Edge Transport Server
Configured E-Mail Address Policies and Journaling throughout the Domain
Installation, Configuration and Administration on Windows Server 2003 and Windows Server 2003 (AD, DNS, DHCP, etc.), Microsoft Workstations, and network security devices such as routers, switches.
Integrating systems, network administration functions, managing system resources and tracking response times to maintain operating efficiency.
Administration and Managing on Microsoft Exchange Server 2003.
Configured the Sonicwall Firewall Site to Site VPN tunnel between Singapore, Taiwan, Hong Kong, Labuan, Samoa, and Cook Islands, maintaining inter site linkage, handling software development and resolving all routing and protocol issues.
Performed hands-on administration, monitoring, and troubleshooting of LAN/WAN, resulting in optimum performance and minimum downtime.
Performed daily system monitoring, verifying the integrity and availability of all hardware, server resources, systems and key processes, reviewing system and application logs, and verifying completion of scheduled jobs such as backups.
Performed daily backup operations, ensuring all required file systems and system data are successfully backed up to the appropriate media, recovery tapes or disks are created.
Provided assistance at the in-house helpdesk providing technical support by phone and in person to the facilities staff.
Maintained computers, installed operating systems and programs on the computers and reassembled computer hardware devices.
Investigated user problems, determined possible solutions, oversaw software, application development, installation and upgrades.
