Professional Excellence Summary

Administration of multiple Lotus Domino servers for 1600+ users in seven locations across North America and Mexico.
Administration and integration of local and remote LAN networks, workstations, servers, and client software.
Perform pre-production and production tests on currently in-market and beta-level tests on Printed Circuit Boards for Texas Instruments, Agilent Technology and Sun Microsystems.

Professional background

2003- 2010: Work as the primary E-Mail administrator for Calsonic North America with the following responsibilities:
Provide E-mail connectivity between clustered Lotus Domino mail servers
Planned, tested, and integrated new servers and software into Domino domain
Supply end-user and external user/vendor support of mail system
Supply necessary maintenance of mail server hardware and software
Supply essential instructions and user maintenance procedures for Lotus Notes client software
Maintain continuity of internal and external mail exchange between the North America, Mexico, Europe, and Japan sites

Implemented and executed e-mail and data archiving solutions using EMC hardware
 Monitored mail infrastructure for any issues and inconsistencies
 Migrated users residing in Novell ND6 to Active Directory 2003
 Perform monthly audits to Active Directory to keep in-line with J-SOX guidelines
 Managed users and server resources through Active Directory per J-SOX standards
 Managed and implemented forest-wide group policies across 6 sites in Calsonic's US and Mexico sites
 Created and tested Group Policy on virtual servers per J-SOX standards
 Maintained logon scripting for users in child domains, stand-alone servers, and Citrix servers
 Maintained DNS, FTP, and HTTP server structure for US and Mexico sites
 Monitored and maintained Active Directory schema for US and Mexico sites
 Planned, tested, and integrated various projects utilizing Active Directory into current domain
 Implemented network servers locally and remotely utilizing required server tools
 Supply necessary maintenance of server hardware, software, and operating systems
 Create, test, and implement virtual server software
 Maintain backups of all local server, including testing and documentation of backup and restoration procedures

1999-2001: Solderwave operator for Benchmark Electronics:
 As a Solderwave operator, I had to source parts per work instruction, inform/train assemblers on part placement on the current kit, configure the solderwave and test its operation, perform titration tests before any builds, pre-profile and perform quality analysis on all production pieces.
