Hooman Bobby Babaei

4431 Forest Creek Drive • Missouri City, Texas 77459

VMWare / Windows Administrator ~ Systems Administrator

Hands-on, solutions-driven professional with more than 7 years of experience spanning a full range of IT operations and systems administration under mixed computing environments.

Well-equipped with BBA in Computer Information Systems, VMWare and MCP Certifications, and extensive background in VMWare VI3/vSphere 4 and Windows administration.

Past performance in developing, implementing, and managing high performance systems, servers, and technical solutions to improve efficiency, productivity, and technical infrastructures.

Organized, take-charge professional with exceptional follow-through abilities and detail orientation, able to plan and oversee projects from conception to successful conclusions.

Successful in partnering with stakeholders, management, vendors, and clients to evaluate needs and ensure timely delivery of quality-driven technology and process improvements.

Demonstrated expertise in troubleshooting and resolving complex system, network, and technical issues within multi-user, deadline-driven environments.

- ? TCP/IP, DHCP, DNS, FTP ? Exchange 2003/2007 ? Telnet
- ? SMTP, POP3 ? Ethernet 10/100/1000, Cabling ? SATA Drives
- ? Dell & HP Servers ? IDE Hard Drives ? SCSI Devices

PROFESSIONAL EXPERIENCE

P2PTek / SMBology ? Houston, Texas 2008-Present

System Administrator / Consultant

Provide high level consultation and administration of VMWare and Windows-based systems for diverse client base throughout Houston area, including numerous E&P companies. Implement, administer, and optimize systems, technologies, and network infrastructures including VI3/vSphere 4 on Host ESX 3.5/4.1, and vCenter 4.1 with an EMC SAN containing 150+ guests, Windows 2008 Hyper-V, Symantec Backup Exec 12.5 & 2010, Windows 2003/2008 Active Directory, DNS, DHCP, and BlackBerry Enterprise Server 5.0. Administer and manage Exchange 2003/2007 and SQL 2005/2008; build and configure virtual and physical servers; and perform patch management utilizing WSUS. Execute system installation and upgrades, as well as system-wide backup and restore. Develop and deploy daily system maintenance plans and protocols, ensuring high levels of system stability/reliability.

Selected Achievements & Projects:

Analyzed client needs and risks; recommended new systems/products, and executed project management/planning initiatives.
 Took lead role in numerous projects; aggressively met project milestones while managing strict time constraints and minimizing user downtime.
 Planned and executed successful migration of 75+ Windows-based physical servers to virtual on VMWare; completed project on time and within budget.
 Increased productivity and efficiency for key clients through implementation of vSphere4 and BlackBerry Enterprise Server.
 Investigated and resolved key performance issues, initiating process and system improvements to increase system stability and staff productivity.
 Built productive relationships with clients, colleagues, and managers, earning reputation as 'go-to' resource for high-risk projects and technical issues.

API, Inc. ? Houston, Texas 2006-2008

System Administrator
 Recruited to perform installation, maintenance, backup, and troubleshooting of systems and server infrastructure in support of corporate operations and hundreds of users. Managed and maintained V13 on Host ESX 3.5/3.0, and Virtual Center 2.5/2 with a Nexsan SataBeast SAN containing 40+ guests. Implemented and managed Symantec Backup Exec 10 and 11 for 75 servers. Administered and managed Active Directory, Exchange 2003, and SQL 2000. Created new accounts and contacts, assigned rights, and added aliases. Conducted and analyzed performance tests of Omni Switches with OmniVista 2500. Monitored and maintained network, server, and storage capacity.

Selected Achievements:

Vitalized operations and improved productivity by automating and upgrading systems and delivering strategic and user-friendly technical advice and support.
 Saved thousands of dollars in technology cost through skillful analysis of potential products and vendors; ensuring cost-effective product alignment with corporate needs.
 Devised and delivered strategic analysis and advice for IT actions spanning system/network development, installation and maintenance.

Abacus ? Houston, Texas 2003-2006

System Administrator / Desktop Support

Supported IT infrastructure planning and operations through skillful system and server administration. Managed 10 guests on ESX server; added memory, processors, and hard drive space. Built, configured, and patched servers. Determined requirements and executed installations and upgrades for hardware, software, operating platform, and network. Administered appropriate tools, diagnostic procedures, preventive maintenance and troubleshooting techniques for server components, desktop systems, and peripherals.

Selected Achievements:

Implemented and managed Veritas Backup Exec for 60 Servers.
 Expedited daily operations including problem analysis/resolution and break-fix support, leveraging technical knowledge and communication skills to provide quick resolution of mission critical issues.
 Acknowledged for high level of responsiveness and technical knowledge.

EDUCATION & TRAINING

Bachelor of Business Administration, Computer Information Systems
 University of Houston, Houston, Texas

VMware Certified Professional, VMware Infrastructure 3

Microsoft Certified Professional
