Strong technical skills relating to Windows 2003, Windows 2000, Microsoft SQL Server, Microsoft Exchange Server, Microsoft IIS, Networking, SAN technologies, and personal computers. Team player and independent thinker with great communication and high work ethic.

SKILLS Hands-on experience with Windows 2003 Advanced Server, Active Directory, Microsoft SQL Server, Microsoft Exchange Server, Internet Information Server, Windows NT4 in the enterprise, DNS, WINS, DHCP, Systems configuration, implementation, and monitoring.

EXPERIENCE

* Please Note that from September of 2000 to present day, employed at same location through multiple company mergers and acquisitions.

Jun. 2008 – Present Airversent / Airclic – Sr. Systems Engineer

Continue to serve as lead in the management of the company's application implementation and installations. Independently perform project management responsibilities for information systems development as it relates to the production environment with focus on resource allocation, requirements, analysis, design, testing, and implementation. Review and analyze software and hardware needs, recommending changes and upgrades to provide efficient, effective, and timely implementations. Function as senior skills resource within the department.

Jan. 2004 – Jun. 2008 TeleCommunication Systems Inc. – Sr. Systems Engineer

Provide primary support for Windows 2000 and Windows 2003 servers and mission critical components that support Production proprietary applications. Function as a knowledge and senior skills resource within the department and to IT Support team during Active Directory Migration. Serve as liaison between Development Team and Network Team during the design period and implementation of the infrastructure that support the company's applications. Monitor and baseline System performance and availability.

Sept. 2000 – Dec. 2003 Aether Systems Inc. – Sr. Systems Engineer

Responsible for oversight of daily network and systems operation, the conduct of research and projects for new technology, and service implementation within the enterprise. Take a lead role in the design and implementation of improvements to network infrastructure and production systems. Function as a knowledge and senior skills resource within the department, and also in a consultative role for other department's technical requirements. Spearhead complex technology implementations

involving database applications, SAN technology, e-commerce and other web technologies, proprietary applications, Virtual Private Networking, and Wide-Area and remote connectivity.

April 1999 – Sept. 2000 Aegon Special Markets – LAN Administrator

A member of the Systems Engineering and Networking group. Responsible for deployment, management, and maintenance of Servers and Networking equipment, support and administer of the NT network, trend, analyze and optimize network and systems performance, research and implement new technology. Everyday duties included network administrative tasks such as troubleshooting connectivity issues, routine server maintenance, scheduled backups and file restorations, user accounts management, e-mail account administration, performance monitoring, network troubleshooting, installation and configuration of various applications, and end-user support.

Jan. 1999 – April 1999 T. Rowe Price Associates – Sr. Installation Technician

Developed, implemented and maintained a standard build for the division. Installed and provided support for the company's Windows NT 4.0 Workstations, the Microsoft office suite, and proprietary workflow applications. Provided second and third level desktop support for the Retirement Planning Services Group.

Sept. 1998 – Jan. 1999 Independent Consulting

Consulted and managed several projects. Played a key roll in a large-scale system rollout, and equipment upgrade for the Detroit Veterans Hospital. Designed and installed several small office networks. Upgraded system hardware and software for clients.

May 1995 – Sept. 1998 Vertical Center Inc. - LAN Administrator

Member of team responsible for the design, implementation, and support of the company's Network. Tasks included cable installation, server and workstation configuration, application rollouts, Network performance monitoring and optimization.

SOFTWARE Microsoft Windows 2003, Microsoft Windows 2000 Advanced Server, Windows NT 4.0 Server & Workstation, Windows NT Terminal Server, Microsoft SQL Server, VMware, Oracle, JBoss, Microsoft Exchange Server and Outlook client, Internet Information Server, Microsoft Cluster Services, Proxy Server 2.0, Microsoft Internet Explorer, IEAK, BackupExec, Arcserve, StarTeam, Check Point FW1, Microsoft Office Suite, NetIQ Appmanager.
